Assume you're given two tables containing data about Facebook Pages and their respective likes (as in "Like a Facebook Page").

Write a query to return the IDs of the Facebook pages that have zero likes. The output should be sorted in ascending order based on the page IDs.

- **Assumption:**

There are no duplicates in the candidates table.

Query

```
SELECT page_id
```

```
FROM pages
```

```
WHERE page_id NOT IN (SELECT page_id  
FROM page_likes )
```

Result

page_id
